## Labor Shed Analysis

A labor shed analysis is defined as where workers work and where workers live relative to a userdefined selection area. This analysis helps to determine where a labor market draws its commuting workers. Labor shed studies can draw comparisons between various geographies including state, Congressional District, Metropolitan Statistical Area (MSA), county, Workforce Investment Area (WIA), Zip Code, and Census tract. By indicating how many of the selection area workers work outside the area, labor sheds can help identify potential pools of workers who would be available for work in the user-defined area.

Labor shed studies provide economic developers and existing or prospective employers a tool to understand the local labor market and make informed expansion and site selection decisions. In addition, labor shed studies can help indicate potential impacts from environmental, social, or economic incidents.

## OnTheMap, Census Bureau

OnTheMap is a mapping and reporting tool developed by the U.S. Census Bureau showing employment and home locations of workers with companion reports for user-defined areas. It is the first synthetic data product released by the Census Bureau. OnTheMap is an important tool for Florida to perform labor inflow/outflow analyses and provide commuting data to planning and economic development agencies as well as Regional Workforce Boards. OnTheMap data is also used by the Department of Economic Opportunity to help quantify natural disaster impacts for emergency management agencies based on where workers live and where they work.

OnTheMap integrates existing data from state-supplied administrative records on workers and employers with existing federal censuses, surveys, and other administrative records. The state Labor Market Information (LMI) agencies supply key data from unemployment wage records and from businesses each quarter. The Census Bureau merges the state-supplied data with current demographic information to produce the data found in OnTheMap. By combining data from different administrative sources, censuses, and surveys, the Census Bureau produces local employment information that was not previously available.

## Florida Department of Economic Opportunity, Bureau of Labor Market Statistics (LMS)

The Florida Department of Economic Opportunity, Bureau of Labor Market Statistics, produces, analyzes, and distributes labor statistics to improve economic decision making. These data are produced as part of the federal/state cooperative statistical program with the U.S. Department of Labor, Bureau of Labor Statistics, and the Employment and Training Administration.

## Executive Summary

The analysis of workforce and demographic characteristics, including commuting patterns of Levy County was conducted to provide economic data on the population and labor force living or working in the county. The report is useful for detailing where workers work and live in order to align resources. This report includes population, labor force, and demographics for Levy County.

Workers employed in Levy County are clustered in the Retail Trade (16.7\%), and Educational Services (13.8\%) industries. Workers living in Levy County are concentrated in the Health Care and Social Assistance (15.3\%), and Retail Trade (13.4\%) industries.

A detailed examination of commuting patterns for Levy County shows that the county has a net inflow of -4,916 workers. Using the latest annual Census data available, there were 7,858 workers employed in Levy County and 12,774 workers living in Levy County. Of the workers who lived in the county, 9,199 workers (72.0\%) were employed outside the county.

With $72.0 \%$ of workers who reside in Levy County employed outside the county, Levy County had the $12^{\text {th }}$ highest outflow rate among Florida counties. Glades County (85.3\%) had the highest outflow rate, followed by Gilchrist County (79.7\%), and Jefferson County (79.7\%). Leon County (18.6\%), Miami-Dade County (20.7\%), and Duval County (23.2\%) had the lowest worker outflow rates.

Of the 9,199 Levy County workers employed outside the county, the top destination counties are Alachua County ( 3,253 workers), Marion County ( 1,351 workers), and Duval County ( 474 workers). Of the 4,283 Levy County workers living outside the county, the top origin counties are Alachua County ( 703 workers), Marion County ( 672 workers), and Citrus County ( 377 workers).
