CALL TO ORDER

The meeting was called to order by Joe Corley, Chair, at 11:33 a.m.

ROLL CALL

Cira Schnettler called roll and a quorum was declared present.

APPROVAL OF MINUTES

It was noted that Marci Olinger was inadvertently not listed as in attendance for the March 21 meeting. The corrected minutes will be attached to these minutes. Marci Olinger made a motion to approve the minutes from the March 21, 2024, meeting with the correction. Ann Hembrook seconded the motion. Motion carried.

PRESENTATION

Rachel Ludwig with the Florida Chamber gave a presentation to the committee. She made the below highlights:

- Florida has 1.34 million net new jobs.

- The demographics of Florida are changing.
 - Florida is seeing an increase in populations aged 20-25, 35-50, and 60+.
 - Florida is seeing a decrease in populations youth 9 and under, adults aged 25-35 and 50-60. The decrease in these age ranges will have a significant impact on workforce needs in the State's long term workforce plan.
- The Future of Work Initiative is projecting Florida to be the nation's #1 workforce by 2030.
- The Florida Center for Workforce and Talent Development has numerous resources for community partners and businesses.
- The Florida Scorecard takes a deep dive into the barriers individuals are facing which are limiting their ability to transition into the workforce.
- One barrier identified was the high number of individuals without a high school diploma.
- She invited committee members to subscribe to the Talent and Education Memo and to attend the Workforce Solutions Summit later in June.
- She also encouraged members to share with businesses the benefits of being a second chance employer. She noted the no-cost trainings coming up in June and December.

DISCUSSION ITEMS

Cory Weaver presented in-demand occupations by sector, noting in each industry sector the most in-demand occupations and the occupations that were requested to be added to the reports from the last meeting. Committee members engaged in discussion. The discussion included identifying barriers and challenges facing individuals in the region.

- Cory Weaver explained that her team was reviewing internal reports to identify barriers by zip code in the region. This will allow for targeted outreach campaigns based on those barriers.
- Focus on both individuals that are receiving unemployment as well as those that are considered not employed but are not participating in career paths.
- Students not receiving their high school diploma. The lack of funding and awareness to resolve the issue.
- Teacher shortages, especially in ESE (noted in construction, medical, and professional sectors).
- Student behavior and its relation to teacher burnout.
- How can technology and/or additional support help teachers in the classroom handle a diverse student population and ESOL students.
- Opportunities within certification programs for on-the-job training and gaining hands on experience. Expose students to experiential learning opportunities.
- High demand occupations within a variety of sectors that have historically been low-wage entry level positions (noted in medical and ag sectors).
- Transitioning individuals in low wage high-demand occupations before they exit the industry to a higher level/wage position.
- Increasing career path awareness to students and individuals in low wage occupations.
- Influence of elections and politics on economy and in-demand occupations.

- Partner with other agencies like the Dwyer Foundation that will provide support to individuals with barriers while the individual is either in school or working with a workforce agency.
- Continue to work with businesses in all sectors to build trust, partnerships, and engagement.

CALL TO ORDER

The meeting was called to order by Joe Corley, Chair, at 11:31 a.m.

ROLL CALL

Cira Schnettler called roll and a quorum was declared present.

DISCUSSION ITEMS

Rusty Skinner provided a brief overview of the purpose of the newly formed committee and State expectations. He explained that the Florida legislature wants businesses and educational partners to come together to create training programs designed around the critical skills businesses need.

Cory Weaver presented in-demand occupations by sector. Committee members engaged in discussion with highlights as noted below:

Construction Sector

- Municipal and industrial positions need representation.
- High demand occupations:
 - Rough carpentry/framers
 - Plumbers
 - Construction Management – degreed with experience or upskilling was preferred versus degreed without hands on experience
- Inter-sector occupations are also in high demand:
 - Welders
 - IT
- Apprenticeships:
 - Lake Weir is partnering with the builder's association to develop a construction pre-apprenticeship program.
 - MTC works with construction companies to create apprenticeship programs.

Manufacturing Sector

- Leadership programs or shorter bootcamps are needed.
- Warehouses are moving toward increased automation this will decrease general warehouse jobs but increase machinery positions for operation and repair.
- Teaching businesses/students how to repurpose existing skill sets. For example, robotics/gaming development skills are transferrable to systems integration.
- Vital to identify which computer languages are priority for training.
- PLC training programs are needed.
- High Demand Occupations:
 - Systems integration positions
 - CNC Machinists trained in FANUC systems

Transportation / Warehousing Sector

- Cory Weaver noted that there was an increase in candidates attending the recent CDL job fair
- Identifying transferrable skills is extremely important. For instance, school bus drivers with summers off can transition to firework transporters.
- High demand occupations:
 - Truck Drivers – Over the road and light duty
 - Mechanics for all fleets
 - Diesel Mechanics
 - Database management – Systems Integrators
 - PLC languages and protocols

Professional Sector

- Vet tech programs are in high demand for our area
- IT:
 - CAD Design and Drafting
 - Cyber Security (especially in Healthcare and PPI)
 - Database Networking

- Artificial Intelligence:
 - There is an unspoken expectation that job candidates aged 16-24 are to bring AI knowledge to the workforce.
 - AI will be touching every industry.
 - Technology is changing so fast, that by the time a student has learned the technology and gets employment the technology may have already changed. Teaching students on multiple platforms and how to be resourceful and flexible to adapting to the changes will have a major impact on upskilling in the workforce.

Education Sector

- Citrus County is developing a teacher pathway for dual enrollment students that may graduate with their paraprofessional license.
- High Demand Occupations:
 - ESE Teachers

Healthcare Sector

- High Demand Occupations:
 - Med techs for labs
 - Biomedical Engineering
 - Therapists:
 - Physical
 - Speech
 - Occupational
 - Respiratory – CF has a program beginning in Fall 2024
 - Rad Techs:
 - MRI
 - Ultrasound
 - Nuclear Medicine
 - IT:
 - Medical cart stations – troubleshooting training
 - Cyber Security
 - Dental:
 - Hygienists
 - Dental Assistants
 - Behavioral Health:
 - Counselors
 - Social Workers

Agriculture Sector

- This is a historic sector for our region.

Industry Fliers

Cory Weaver presented a sample of an industry flier that is given to students. These fliers are used to market occupations to students. The fliers are customized by industry for each county and pathway options. They are used to help develop talent pipelines.

Cory Weaver also encouraged the committee members to review the sector lists and share any other occupations that may not be on the list or new occupations. As new skills are required by business, new types of occupations are created. This will help us look ahead into workforce trends, such as advancements in AI.

Rusty Skinner concluded with a call to action for everyone to go out into their networks and continue these discussions. He also offered to host and facilitate any meetings to foster industry discussion. The next Consortium meeting will be held in June or July. A calendar invite will be sent.
